EDUCATION

Electronic Communication, *AGTI Kyaukse*   2019

PROFILE

Junior Web Developer with a solid foundation in modern web technologies. Skilled in **React.js**, **Next.js**, and **Laravel**, offering expertise in both frontend and backend development.

PROJECTS

Crypto App, *React Js* 🔗
   Github 🔗
   A React.js-based web application providing comprehensive information on various cryptocurrencies, including the top 10 cryptocurrencies, complete cryptocurrency listing, search functionality, crypto details, news and updates, and exchange information.

Weather App, *React JS* 🔗
   Github 🔗
   A React.js-based web application that retrieves weather information based on location using the OpenWeatherMap API.

Visitor Management System, *PHP*
   Github 🔗
   Developed a PHP-based web application for visitor management, utilizing MySQL for data storage. Features include authentication, visitor CRUD operations, and visitor details management.

Blog App, *Laravel , Livewire* 🔗
   Github 🔗
   A Laravel-based blog application with an admin panel. Features include post creation, commenting, user-specific views, search functionality, and filters.

Ecommerce, *React Js, Laravel* 🔗
   Github 🔗
   This Ecommerce application uses React.js and Laravel for frontend and backend respectively, with Redux for state management and Stripe for payments. React Query is also utilized for efficient data fetching.

My Social, *Next Js , Larevel , Laravel Reverb*
   Github 🔗
   Developed a real-time social media application using Next.js for the frontend and Laravel for the backend.

Next Soundtrack, *NextJs, Laravel* 🔗
   Developed a music streaming app with Next.js for the UI and Laravel for the backend.

SKILLS

HTML, CSS, Tailwind Css, Bootstrap, JavaScript, React Js, Next Js, PHP, MYSQL, Laravel
